RESEARCH INTENT
WQE7006/7023 Cyber Security Research Project

Name	
Matrix No	
Supervisor	
Area of Research	Clearly state the field or topic you'd like to focus on for your research.
Research Title	State your title
Introduction	Begin with a brief introduction to your research topic. Provide context for the problem or area of study you're addressing.
Statement of Aim	Clearly state the main purpose or goal of your research. This should answer the question, "What do you hope to accomplish with this research?"
Research Questions	Formulate the key questions that your research seeks to answer. These questions should guide your investigation and help focus your efforts.
Research Objectives	List specific objectives that outline what you intend to achieve through your research. These objectives should be clear, measurable, and achievable.
Significance of the Research	Briefly explain why this research is important. What gap in knowledge does it address, or what potential impact could it have?
Methodology	Mention the general approach you plan to take for your research. Will you be conducting surveys, experiments, or analyzing existing data?
Expected Outcomes	Describe the potential outcomes or contributions of your research. This could include new insights, solutions to problems, or recommendations for future research.
Skills Needed	Briefly highlight your skills and experience that make you a suitable candidate to undertake this research.
Timeline	Provide a rough timeline for your research, including key milestones and deadlines.
