AI & Data Excellence Summer Enrichment Programme (AESEP)

– By Balqis Bahari, Norisma Idris

The Faculty of Computer Science and Information Technology (FCSIT), Universiti Malaya together with Global Mobility Centre (GMC) recently hosted the *AI & Data Excellence Summer Enrichment Programme (AESEP)*, a dynamic international initiative aimed at exposing students to cutting-edge knowledge in Artificial Intelligence (AI), Data Science, and related digital technologies.

Held in collaboration with INHA Technical College, Korea, the two-weeks programme brought together undergraduate students and academic experts for a series of engaging lectures, workshops, and cultural exchanges.

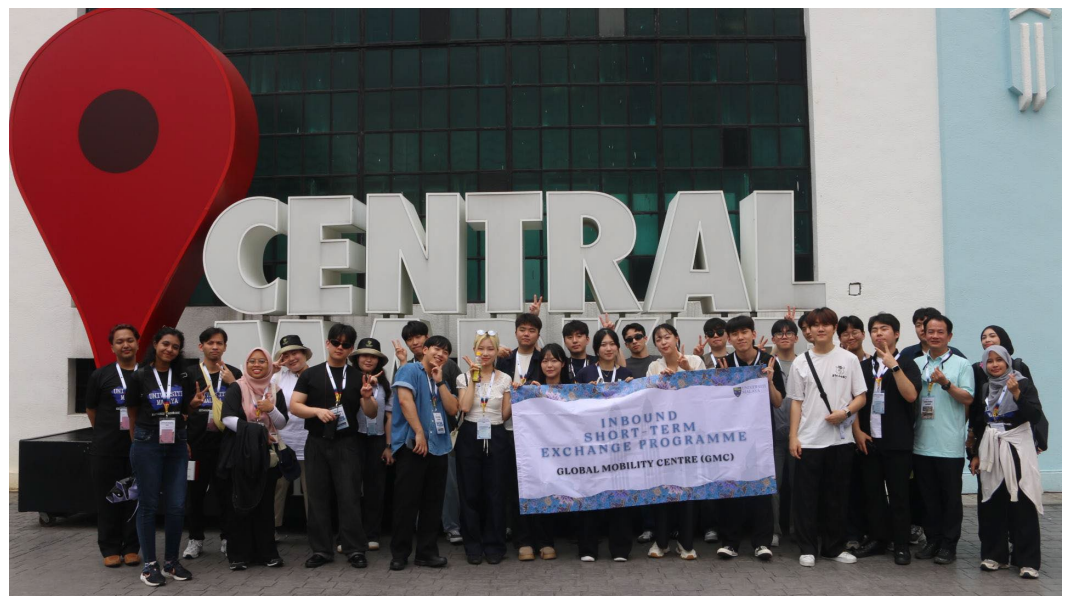

The AESEP 2025 cohort had the opportunity to explore key topics such as Artificial Intelligence for Everyone (AI4E) and Data Analytics - all delivered by experienced faculty members.

In addition to classroom sessions, students took part in hands-on activities, coding challenges, and AI project showcases. The programme also featured site visits to innovation labs and cultural landmarks, fostering a unique blend of academic enrichment and cross-cultural experience.

This initiative reflects FCSIT's continued commitment to nurturing global tech talents and enhancing international collaboration in the field of emerging technologies. The AESEP is not only a platform for academic growth but also a step forward in cultivating a new generation of responsible and innovative AI practitioners.

The Students dressed in traditional Malay attire

As FCSIT continues to drive innovation and collaboration through programmes like AESEP, Universiti Malaya remains steadfast in its mission to nurture future-ready, globally competent digital leaders. This initiative not only strengthens academic networks but also lays the foundation for deeper international partnerships in the years to come.
